

ACNM takes this opportunity to congratulate the top abstract presenters at ACNM 41st Annual Meeting in San Antonio, Texas.

Sino-American Winners

Mickaila Johnston for *“Reducing perceived pain levels during non-breast lymphoscintigraphy”*

Manohar Kuruva for *“Prognostic value of interim PET in patients with DLBCL and comparison of various interpretation criteria- A prospective single center study”*

Katy Gaines for *“Abnormal FDG-PET Findings and Sub-Optimal Effort in Veterans with Mild Traumatic Brain Injury”*

Russell Kosik for *“The Deauville 5-point scale improves the prognostic value of interim 18F-FDG-PET/CT in extranodal natural killer/T-cell lymphoma”*

Adam Kesner for *“Fully automated data driven respiratory motion control in PET”*

Zaid-Al-Faham for *“The effects of Metformin in patients with or without hyperglycemia on physiological 18-FDG distribution in the cerebellum, mediastinum, liver and colon”*

Karen Ayres for *“Dose reduction in pediatric bone scintigraphy: validation of the 2010 North American Consensus Guidelines (NACG)”*

Lida Jafari for *“Regional cerebral metabolism changes in blast-induced traumatic brain injury and post-traumatic stress disorders”*

Holly Thompson for *“A Prospective, Matched Comparison Study of SUV Values from Non-TOF vs. TOF PET/CT Scanners”*

Anuradha Thenkondar for *“Low Testosterone is Associated with Increased Vascular Inflammation on 18F-FDG PET in Men with Prostate Cancer”*

Amit Singnurkar for *“Regression Modeling to Determine the Optimal SUV Measurement to Predict Malignancy in Indeterminate Pulmonary Lesions Evaluated with 18-F-FDG-PET/CT Imaging”*

Sumera Ali for *“Accuracy of FDG PET-CT versus CT alone in differentiating acute sinusitis from other sinus disease”*
