

Call for Volunteers

The PET Center of Excellence seeks volunteers for two key initiatives – if you are interested in participating in these working committees, please email K. Malaika Walton (mwalton@snmmi.org), Associate Director of Governance. Please include a one paragraph statement of interest and your CV:

PET/MRI Working Group: The PET Center of Excellence has launched a PET/MR working group that will bring together members from across SNMMI. PET/MRI is an emerging imaging modality that requires significant development to realize its full potential in research and clinical care. The objective of the SNMMI PET/MRI working group is to support the development of PET/MRI and to educate physicians, researchers and technologists. It will support educational activities at the annual meeting, webinars and workshops jointly sponsored with other organizations. PET/MRI is truly an intersociety modality requiring input from multiple organizations to help accelerate its development and clinical adoption. The new PET/MR group will work with the SNMMI community to address member needs and help advance PET/MRI.

Theranostics Task Force: The purpose of this committee is to focus on the utility of PET for therapy. Specifically, to evaluate, educate on, and promote the use of PET as an adjunct for therapies. While the primary therapeutic focus is targeted radionuclide therapies (TRT), this working group will focus more largely on any role of PET related to therapies (i.e., patient selection and/or radiation treatment planning). Current projects are examining the role of Ga68-DOTATATE for Lu177-DOTATATE therapy in NETs and the role of F18-FDG in radiation treatment planning.
