

March 24, 2014

Dear Nuclear Medicine Professional,

Based on currently available resources and projections for Molybdenum-99 (Mo-99) supply, we expect to meet standing customer orders for Technetium-99m generators as shown below.

APRIL 2014						
S	M	T	W	T	F	S
		1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30			

	Generator standing orders met
	Majority of generator standing orders met but no extra
	Generator standing order shortage resulting in size reductions
	Significant shortage to generator standing orders

This outlook is based on the expectation of the Nuclear Research and consultancy Group (NRG) that the Dutch Mo-99 Production Facility (MPF) will be operational by mid-April. NRG is the licensee of the MPF, and Mallinckrodt operates the facility. We continue to work closely with NRG.

Should anything change related to this forecast, we will provide an update. If you have questions, please contact your Mallinckrodt Sales Representative or our Customer Service department at 888-744-1414. Thank you for your continued support.

Sincerely,

Dan Brague
 Vice President & General Manager, Imaging - North America
