STATUS UPDATE OF THE NTP MANUFACTURING PLANT

I am happy to announce that NTP received approval to resume normal operations.

SAFARI-1 has been restarted and routine production of Mo-99 will resume as of 18 August 2014 as communicated in my previous letter.

I want to apologise again for the supply interruption and want to assure you of NTP's commitment to reliably supply you with the high quality products and services that you were accustomed to. Our Marketing and Sales team will be contacting you shortly to coordinate and schedule the resumption of supply to yourself.

Best regards,

Tina Eboka
