

General Clinical Nuclear Medicine Council Goals

Goal 1: (70% Completed)

Increase awareness of GCNMC and increase membership. The council will consider a variety of options used by other councils to increase membership and determine the strategy that will work best for them, including a campaign through delivery of GCNMC information page and Newsletter to the SNMMI membership.

Increase membership: Starting in Sept 2015, the GCNMC will offer free memberships to residents-in-training and technologists.

SNMMI Strategic Plan Goals that relates to this goal:

- Goal B: Facilitate and support the availability and clinical utilization of nuclear medicine and molecular imaging technologies.

Current Progress: while membership in other councils has been decreasing, ours has increased slightly (Updated: 12/26/2014)

Next Steps: Continue promoting and increasing awareness, publish Newsletter on the web at least 1-2x/yr Starting in Sept 2015, the GCNMC will offer free memberships to residents-in-training and technologists. (Updated: 05/07/2015)

Goal 2: (70% Completed)

Increase collaboration with other councils in planning educational programs

SNMMI Strategic Plan Goals that relates to this goal:

- Goal A: Advance the development and approval of nuclear medicine and molecular imaging technologies.
- Goal B: Facilitate and support the availability and clinical utilization of nuclear medicine and molecular imaging technologies.

Current Progress: GCNMC Board members are 100% involved in CME planning, contact with membership at large has been minimal (Updated: 12/26/2014)

Next Steps: Increase collaboration with other councils in planning educational programs (Updated: 05/07/2015)

Goal 3: (100% Completed)

CME courses for Mid-Winter and Annual Meetings. Six CME sessions and 1 Categorical Seminar have been accepted for the 2015 AM:

1. Underappreciated Physiologic and Pathologic Aspects of NM
 2. Thyroid + Parathyroid SPECT/CT
 3. Back to Basics: Optimal Pt Prep, Pharmacologic Interventions + Interactions
 4. GI Bleed
 5. PE
 6. Children Not Small Adults (jointly w PIC)
- Categorical: Infection+ Inflammation (jointly w CMIIT)

SNMMI Strategic Plan Goals that relates to this goal:

- Goal A: Advance the development and approval of nuclear medicine and molecular imaging technologies.
- Goal D: Advance and promote quality, value and safety of Molecular Imaging and Nuclear Medicine.

Current Progress: No data entered.

Next Steps: No data entered.

Goal 4: (100% Completed)

Continue to work with the Procedure Standards Committee on review of general nuclear medicine procedures.

SNMMI Strategic Plan Goals that relates to this goal:

- Goal B: Facilitate and support the availability and clinical utilization of nuclear medicine and molecular imaging technologies.
- Goal D: Advance and promote quality, value and safety of Molecular Imaging and Nuclear Medicine.

Current Progress: As new guidelines are being written or revised, members of GCNMC are participating in their review (most recently the Guideline on Dynamic Renal Scintigraphy (Updated: 12/26/2014)

Next Steps: Continue current practice (Updated: 12/26/2014)

Goal 5: (20% Completed)

Seek to educate and improve general knowledge about the use of general nuclear medicine procedures. The council Intern, Dr. Blaine Mischen, is continuing a project looking at ways to increase understanding and use of nuclear medicine procedures by educating residents at MUSC.

Our new intern, Dr Zaid Al-Faham, will expand the idea by producing educational materials to educate the referring physicians about the clinical utility of NM procedures. He will look into ways to publicize + market these materials via SNMMI.

SNMMI Strategic Plan Goals that relates to this goal:

- Goal B: Facilitate and support the availability and clinical utilization of nuclear medicine and molecular imaging technologies.
- Goal D: Advance and promote quality, value and safety of Molecular Imaging and Nuclear Medicine.

Current Progress: No data entered.

Next Steps: Our new intern, Dr Zaid Al-Faham, will expand the idea of educating the non-NM medical community by producing educational materials for referring physicians about the clinical utility of NM procedures. He will look into ways to publicize + market these materials via SNMMI. (Updated: 05/07/2015)
